ABOUT KOGNITY:

Kognity is collection of electronic textbooks (<https://www.kognity.com/about-our-textbooks/>) that the school wishes to introduce in several subjects. This resource is more than a textbook; it will provide our learning community with a good opportunity to facilitate interactive learning as well as the follow up of the student's progress. Kognity allows teachers to obtain easily information about the student's achievements as well as to generate tailored evaluation tasks. In addition, curriculum contents can be updated regularly and quicker than through the publication of a new paper book edition.

For the subjects where an electronic textbook will be requested the school will advance the payment and send an invoice to each student. According to the information sent by Kognity, the price will be as follows:

- Student Access to all IB Kognity Textbooks: €155/student for the Diploma Program (24 months).

OR

- Student Access to individual IB Kognity Textbooks: €110/student and Subject Matter for the Diploma Program (24 months).

In the majority of the cases, it will be more cost-effective to choose alternative 1. In addition, for the subjects where the teachers request a paper textbook, the students who go for alternative 1 will have access to the digital textbook as an additional resource. You will find here the list of subjects offered by Kognity: <https://www.kognity.com/subjects/>.

Be aware that History and Theory of Knowledge will soon be available too.
